THE QUANTUM SPACETIME SEMINAR SERIES

**On IR dualities across dimensions
(Zoom Seminar)**

**Shlomo S. Razamat
(Technion)**

Date: September 26, 2022

Time: 3.00 PM IST

Zoom link shall be shared separately

In this talk we will overview recent progress on understanding some aspects of IR dualities between Lagrangian constructions of 4d SCFTs and their engineering starting from 6d. We will illustrate these understandings mainly with the compactifications of D-type conformal matter and higher rank E-string theories down to four dimensions.
